

“Welcome to My World,
the World of **THE INHIBITOR**.
A world which has no place for **RUST**.
A world I guard with my **EcoShield**,
The world of **SECURUST**. . .”

THE
INHIBITOR

WATER

CORROSION

AIR

One should know about their Enemies inside out; The extent of their Powers, Their Weaknesses. How to Overpower them, and keep them at Bay.

"Corrosion is an evil force that sneaks in stealthily. He uses water and oxygen both of which are present in the environment. The innocent victims Iron & Steel, combine with water 'against their will', through a natural process to form hydrated iron oxide which is nothing but **Super Villain Corrosion.**"

According to Govt. data, India is annually going through losses, due to corrosion of infrastructure and other vital installations. This is approximately equivalent to 4% of our GDP, making it a huge blow. When it comes to a manufacturing set up, '**Corrosion**' becomes the Prime Enemy as metal parts are vulnerable to it at every stage.

MEET THE INDUSTRIAL PACKAGING VETERANS-

**Aditya Packaging &
Consulting Services Pvt. Ltd.**

Complete Packaging Solutions For Your Products

My parent company, Aditya Packaging & Consulting Services Pvt. Ltd. is a name of repute in the field of industrial packaging & corrosion prevention solutions. We have a solid experience of 15 years in this business and have made a mark in the field.

Our focus on innovation and a highly motivated team with excellent technical knowledge and experience have made us one of the fastest growing manufacturers of rust prevention solutions in India.

We believe in adapting cutting edge technology, which means newer weapons for me! With an understanding that every customer's needs are unique we consistently introduce innovative packaging solutions to satisfy even the most demanding and quality conscious customers.

SECURUST™

— Security Against Rust —

A Villain may garner all the power in the world,
but a **Hero** is always born to defeat him!

Fear not! 'SECURUST' was developed to defeat
the Corrosion Monster, providing holistic &
eco friendly Rust Preventive Solutions.

VCI or Volatile Corrosion Inhibitor products emit molecules that form a protective layer on metal surfaces thus shielding them against corrosion. However, the current VCI products in the market are not eco friendly. Hence, there is a need for a safe, reliable, and recyclable product. The VCI products under **Securust** are made using advanced technology, giving them Superlative Quality. To top it all they are amine and nitrite free, non-toxic, USFDA approved, IIP, BFSV Certified and completely environmental friendly!

SECURUST AVATARS

"I, **THE INHIBITOR** possess an Almighty **EcoShield** that yields varied Super Powers!
Be it film, paper, desiccant, chemical, I will take on any Avatar, to protect your products in every way possible!

SECURUST VCI FILM

About Product:

Securust VCI film has set the standard for high performance protection by using one of the most innovative and cutting-edge film technologies in the VCI industry. This product offers protection to a wide range of ferrous, non ferrous and composite metals.

Our bio-based VCI films are nitrate and amine free, thereby making them recyclable & non-toxic. It is available in varied forms and can be supplied in sheets, rolls, tubing, 2D and 3D bags.

Applications:

Metals, Automotive, Engineering, Electrical & Electronics, Defence Industry

VCI PAPER

About Product:

Specially matured Kraft papers are coated with our hi-tech, Eco-friendly VCI to ensure protection of metals in adverse conditions. They are used to pack components that require high shelf life. The dry packaging which this product provides eliminates cleaning and de-greasing.

Applications:

Metal Mills, Automotive, Engineering, Electrical – Electronics, Defence

SECURUST HDPE WRAP

About Product:

Securust HDPE wrap offers superb protection against corrosion. The outer PE lamination inhibits moisture entry in to the package and the HDPE woven fabric provides strength and durability. VCI lamination on the inside ensures superior corrosion prevention.

Applications:

Coils, Wires, Sheets, Rods, Aluminum, Steel, Machinery, Defence Equipments

HDPE LAMINATED WITH VCI PAPER WRAP

About Product:

When Securust VCI paper is laminated with HDPE fabric, it provides superior corrosion prevention especially for storage in open areas and long sea shipments. VCI paper with HDPE lamination provides remarkable tensile, puncture and tear strength along with water proofing qualities.

Applications:

Metal mills, Automotive, Steel coils, Engineering, Defence

SECURUST AL LAMINATED BARRIER FOIL

About Product:

Our Securust Al laminated barrier Foil consists of high strength PET film, aluminum foil and co-extruded VCI film. MVTR is virtually nil. Corrosion is kept at bay by maintaining humidity level below 40 RH. It is the perfect solution for a long protection period extending up to 15 years!

Applications:

Machinery and equipment, Engines, Control Panels, Defense and Aerospace, Heavy Equipment, Spares for Power Plants and Refineries

SECURUST SHRINK FILM

About Product:

This is a tough co-extruded VCI shrink film designed for the most demanding corrosion inhibiting applications. It is an ideal product for ODC export shipments and contains UV inhibitors. This product has very high tear resistance and dart impact. We also make covers of custom sizes as per specifications. Heat shrink guns are also available with us.

Applications:

Heavy equipment, Military and Naval equipment, Jet Engines, Machinery, Wind Mills, Power Plant Equipment, Chemical Plant Equipment, Robotic Plants

SECURUST VCI STRETCH FILM

About Product:

Securust VCI Stretch film has VCI properties to provide protection from corrosion for stretch wrap packaging applications. It can be used for banding, wrapping and unitizing loads. It keeps metal clean and corrosion free while containing each load for maximum safety.

Applications:

Steel coils, Wires, Strips, Tubes, Auto Industry

RUST PREVENTIVE CHEMICALS

About Product:

We manufacture solvent based rust preventive chemicals, engineered to provide short, medium and long term protection. Securust offers a wide range of rust preventive chemicals, which combines excellent corrosion prevention along with other benefits such as:-

- Dewatering
- Easy removability
- High coverage area
- Thin film- less than 5 microns

Applications:

Casting, Forging, Sheet Metal, Sintered Metal, Machined Parts, Machinery

DESICCANTS

About Product:

We offer a wide range of advanced desiccants (moisture absorbents) for excellent protection of goods. Our product's desiccating performance ranges from 30% to over 200%. These Desiccants are packed in DuPont, Tyvek® pouch for excellent desiccating action. Our products are RoHS compliant and DMF, PCP free.

Applications:

Automotive, Electronic Components, Electrical Equipments, Bulk Chemicals, Pharmaceuticals

CERTIFIED BY

US Food & Drug Administration

भारतीय पैकेजिंग संस्थान
Indian Institute of Packaging

An autonomous body under the Ministry of Commerce & Industry, Govt. of India

Celebrating 50 years

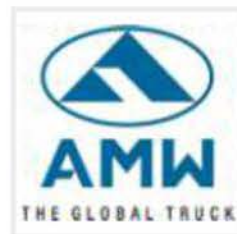

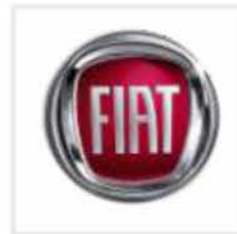

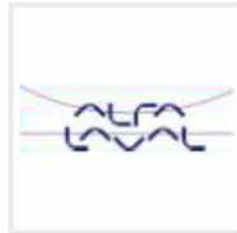

"I am **THE INHIBITOR**,
I am **THE PROTECTOR**,
I am... **'SECURUST'!** "

OUR SATISFIED CLIENTS-

I, The Inhibitor am all geared up to defeat Corrosion and Moisture! With my Super Powers, I will shield your products against moisture and promise to provide complete **'Security Against Rust'!**
